A				<p>Material:High strength plastic material</p> <p>Processing Technology:Purchase</p> <p>Description:The tripod is a crucial component of our system that provides a stable and rigid platform to hold the telescope's optical tube assembly. The primary function of the tripod is to support the weight of the telescope and keep it steady while observing the night sky.It allows the observer to level the telescope on uneven ground and adjust the height to the observer's comfort level.</p>
